

MOTORISTS

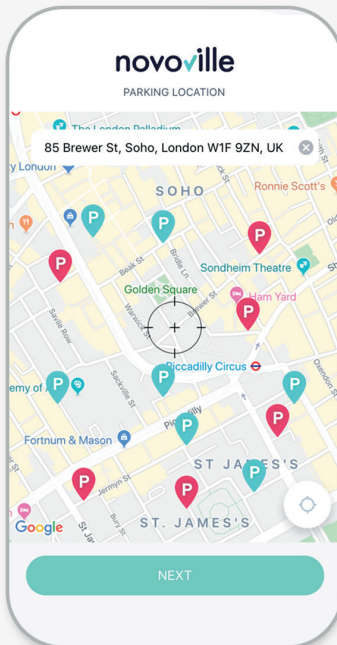

PARK SMARTER WITH THE NOVOVILLE APP

Get to your destination faster with the easiest way to find and pay for parking! No more driving in circles, fiddling for change or searching for the nearest parking meter. Parking permits and fines can also be paid through the Novoville app — quickly, easily and securely.

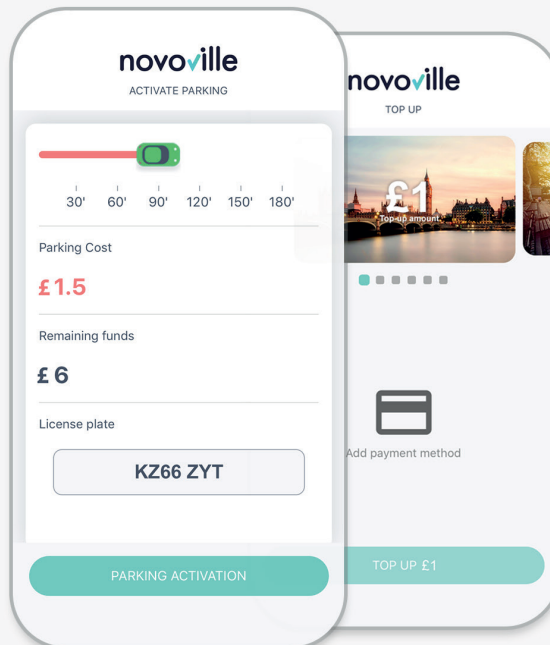

1

**Find available on-street
& off-street parking**

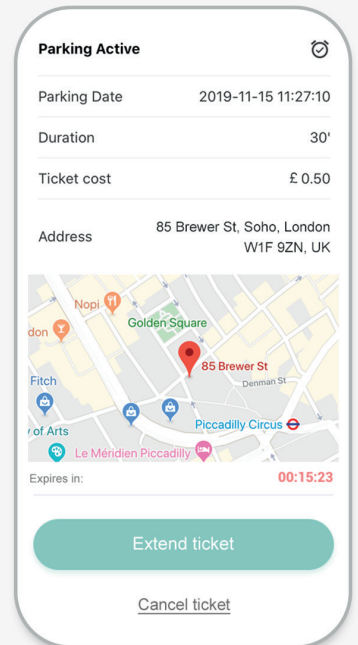

2

**Buy parking time instantly or top up
your wallet for later**

3

**Extend your parking
time remotely**

**Get reminders before your
parking session expires**

**Claim discounts
automatically**

**Add multiple vehicles and
credit cards to one account**

**Pay for parking
permits & fines**

**View your
receipts**

**Get live notifications about
planned works & limited access**

Novoville Parking

LOCAL AUTHORITIES

END-TO-END SMART PERMIT & PARKING SOLUTION

Novoville Parking creates a seamless parking experience from the moment a driver arrives, through the reporting of parking activity in the city. Our broad range of parking solutions cohesively work together and integrate with third-party IoT platforms, allowing local authorities to launch, connect and manage their mobility ecosystems.

1

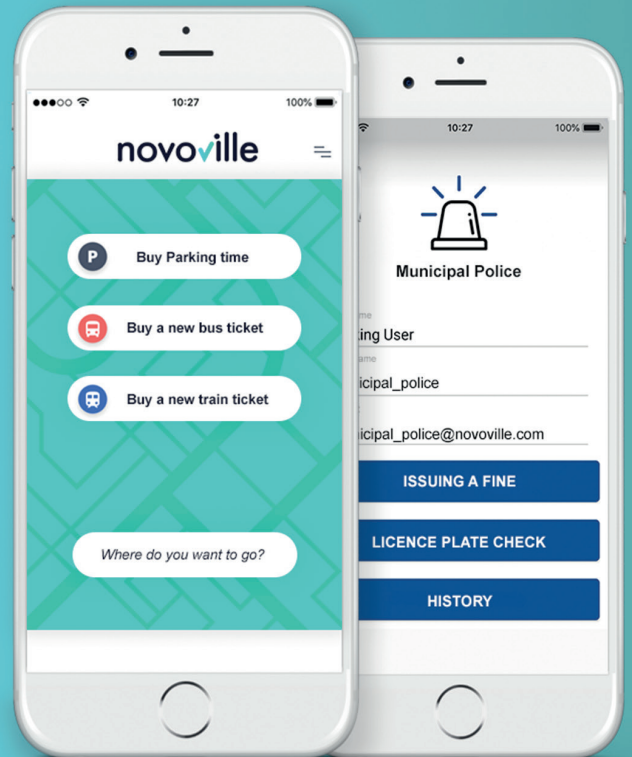

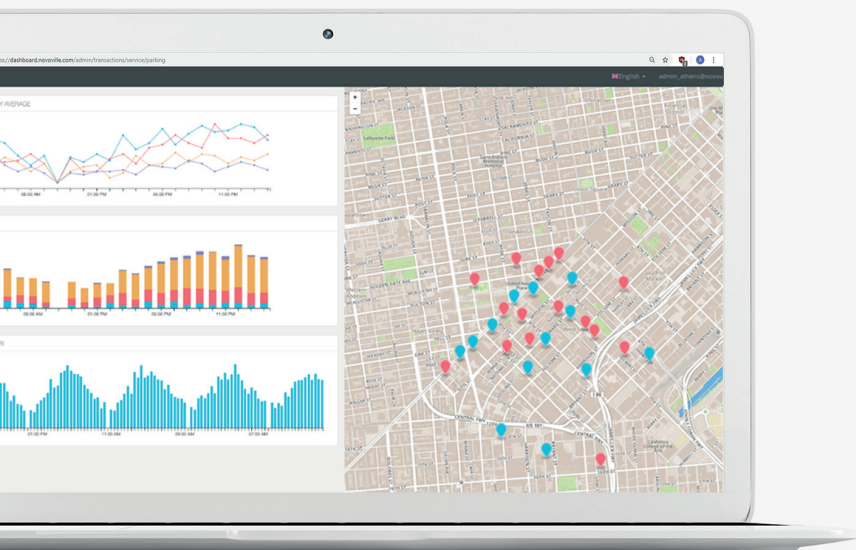

Enable motorists to pay for parking spaces & permits fast and conveniently.

Our app makes it simple to book and pay for a parking spot, reducing illegal parking and traffic congestion.

2

Bring all public and private mobility service providers in one system.

Allow residents and visitors to plan multimodal trips, book and pay for public transportation tickets, taxis, rental cars, etc.

3

Monitor and report parking violations accurately and efficiently. Our Civil Enforcement Officer app easily scans vehicle registration plates and connects to a handheld printing device that issues parking tickets immediately.

4

Integrate data from smart parking sensors and IoT applications. Inform drivers about the availability of parking spaces in real time while you monitor live and historic occupancy data.

5

Get complete control of parking operations in the city. Report accurately and make data-driven decisions using our cloud-based dashboard.
